

The Physics of Star Formation and Early Stellar Evolution

Filesize: 6.51 MB

Reviews

This is actually the greatest publication i have go through right up until now. I really could comprehended every little thing using this composed e book. I realized this book from my i and dad advised this ebook to learn.

(Jimmie Schmidt I)

THE PHYSICS OF STAR FORMATION AND EARLY STELLAR EVOLUTION

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of the NATO Advanced Study Institute, Agia Pelagia, Crete, Greece, May 27-June 8, 1990 | The origin of stars is one of the principle mysteries of nature. During the last two decades advances in technology have enabled more progress to be made in the quest to understand stellar origins than at any other time in history. The study of star formation has developed into one of the most important branches of modern astrophysical research. A large body of observational data and a considerable literature now exist concerning this topic and a large community of international astronomers and physicists devote their efforts attempting to decipher the secrets of stellar birth. Yet, the young astronomer/physicist or more advanced researcher desiring to obtain a basic background in this area of research must sift through a very diverse and sometimes bewildering literature. A literature which includes research in many disciplines and sub disciplines of classical astrophysics from stellar structure to the interstellar medium and encompasses the entire range of the electromagnetic spectrum from radio to gamma rays. Often, the reward of a successful foray through the current literature is the realization that the results can be obsolete and outdated as soon as the ink is dry in the journal or the conference proceeding in which they are published. | I: Physics of Giant Molecular Clouds: Origin, Structure, and Evolution. Star Forming Giant Molecular Clouds; L. Blitz. The Origin and Evolution of Giant Molecular Clouds; B.G. Elmegreen. Cosmic Magnetism and the Basic Physics of the Early Stages of Star Formation; T.Ch. Mouschovias. II: The Physics of Star Formation. OB Associations and the Fossil Record of Star Formation; A. Blaauw. Physical Conditions and Heating/Cooling Processes in High Mass Star Formation Regions; R. Genzel. Newly...
