Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

NOUVEAU DICTIONNAIRE DE MEDECINE ET DE CHIRURGIE PRATIQUES (39)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Original publisher: Washington, D. C. : United States Environmental Protection Agency, Office of Water, Office of Science and Technology 2003 OCLC Number: (OCoLC)61710067 Subject: Drinking water -- Contamination -- United States. Excerpt: . . . 5. SUMMARY Five chemicals have been identified as potentially qualifying for revision on the basis of new IRIS or OPP health assessments that could impact the MCLG. These are beryllium, 1, 1-dichloroethylene, lindane, oxamyl, and picloram. This tentative identification of chemicals potentially qualifying for revision was conducted independently of other considerations (e. g. , analytical and treatment technology, occurrence data), which may influence the final selection of contaminants to be revised. Three chemicals-cyanide, di (2-ethylhexyl) adipate and thallium-are high priority for reevaluation because of reproductive and or developmental concerns. New IRIS risk assessments of these chemicals have been initiated. The new risk assessments are expected to be completed in the 2004 2005 time frame for cyanide, 2003 2004 for di (2-ethylhexyl) adipate, and 2004 2005 for thallium (USEPA, 2003b). New data have become available regarding the effect of fluoride on bone, and the contribution of various sources to total fluoride exposure (WHO, 2002). At the request of EPA, NAS has initiated a review of the toxicological data on fluoride, including effect on bone, as well as the relative contribution of various sources to the overall exposure to fluoride. Hexavalent chromium is under study by the National Toxicology Program (NTP, 2002). Once the subchronic and chronic studies are completed, the Agency will evaluate the toxicological data with regard to their impact on the present MCLG. Table 5 summarizes the review process applied to each of the 68 chemicals under consideration....
